

CRP - MCA

Anti-human C-reactive protein monoclonal antibody

Host animal : Mouse

Specification

Purity

Specifications
≥95% (HPLC)

Specificity

No Cross-Reactivity is determined by Immuno-Electrophoresis with human normal serum, except CRP.

IgG Subclass

IgG₁

Feature

CRP-MCA is purified by affinity chromatography with protein A from mouse ascites.

Preparation

about 10 mg/mL (0.15 mol/L NaCl and 10 mmol/L phosphate buffer containing 0.05% NaN₃ pH 7.5)

Storage

2~10°C

OYC No./Package

| OYC No. | Package |
|----------|---------|
| 47858000 | 1 mg |
| 47155000 | 5 mg |
| 47858900 | Bulk |

(Research reagent use only, not for medical use.)
